Handheld Europe adds Imager Option to M3 Mobile Rugged Handheld PDA *Rugged mobile computer now reads 2-D barcodes and postal codes*

Handheld Europe expanded the versatility of the super slim, rugged M3 Mobile PDA today by introducing an optional integrated imager. This new option extends the functionality of the M3 Mobile with the ability to read two-dimensional barcodes and symbols as well as the more common linear barcode types.

The full-featured M3 Mobile rugged mobile computer comes with advanced features such WLAN, Bluetooth, camera, integrated GSM/EDGE cellular capabilities and GPS. The M3 Mobile weighs only 270 grams, is IP64 rated and can handle extreme temperatures and multiple drops from 1.5 meters.

"The M3 Mobile is a rugged, full-featured unit that customers can depend on", said Thomas Löfblad, Managing Director of Handheld Europe. "The addition of the 2D bar code scanner extends its value into more applications and allows us to offer it to an even wider audience."

The M3 Mobile with the imager is available immediately.

About Handheld Europe:

Handheld Europe is a European supplier of rugged mobile computers.
